

Dan Schmutz is the Chief Environmental Scientist and a Vice President for Greenman-Pedersen, Inc. (GPI), a 1,500-person multidisciplinary consulting firm. He has over 20 years of professional experience focused on the development and application of ecological and hydrological field assessments, GIS analyses, and appropriate statistical techniques for addressing questions of interest to water supply managers.

Devon Moore is an environmental scientist with the City of Winter Haven who supports natural resources management through a data-driven approach. With a belief that knowledge should be at the heart of decision making, he strives to make education and community involvement a core part of his career. Devon holds a B.S. degree in Marine Biology from the University of Tampa and has a background in aquaculture, aquaponics, and water chemistry.
